OFFICIAL NAPA LAGGER'S CHOICE RULES

v.1.0

TEAM MATCH PLAY RULES

1. THE LAG

To perform the lag, both shooters are to simultaneously shoot a ball from behind the head string to the foot rail and back toward the head rail. Whichever shooter's ball comes to rest closest to the head rail is winner of the lag. It does not matter if a shooter's ball touches the head rail; the ball closest to the head rail wins the lag.

2. SCORE SHEET PLACEMENT

In Lagger's Choice, the winner of the lag is **always** placed in the Shooter #1 position on the score sheet.

3. WINNER OF THE LAG

The winner of the lag must either:

- a. Pick the game format (8-ball, 9-ball, or 10-ball)
- b. Break the rack

If the winner of the lag chooses to pick the game format, he/she cannot get credit for a rackless match, even though he/she is in the **Shooter #1** position on the score sheet.

4. HOW TO SCORE RACKLESS MATCH

The only way to score a rackless match is:

- a. Win the lag
- b. Choose to break the rack and...
- c. Shut out the opponent

5. ADDITIONAL RULES

All other NAPA game format rules apply to the game chosen after the lag.
